Notes

1. All light-duty and medium-duty vehicles are capable of Level 1 (120V) & Level 2 (240V) charging. Most heavy-duty vehicles require Level 3 (480V) charging, also known as DC Fast charging. Only fully battery electric vehicles (BEVs) are capable of DC Fast charging; plug-in hybrid electric vehicles (PHEVs) are not able to utilize DC Fast charging.
2. Most EVs cannot support additional loads beyond the vehicle's standard equipment (upfitting). GSA does not recommend adding any aftermarket equipment to EVs to avoid overloading the vehicles or voiding manufacturer warranties. This does not apply to the GSA-procured law enforcement upfit packages which have been tested and reviewed.
3. The table below describes the charging equipment options available from the manufacturers for specific models:

Charging Options	BEV Models (SINs)
Level 1 Cord - No Cost Standard Equipment	Nissan Leaf (8E)
	Hyundai Kona Electric (98E)
